EDUCATION

SMK – TEKNIK MESIN
2016 - 2019

SMK PRAKARYA INTERNASIONAL BANDUNG

The Mechanical Engineering Vocational School program focuses on equipping students with the knowledge and skills needed to design, manufacture, and maintain mechanical systems and machinery. Students learn about materials, mechanical design, automation, and maintenance processes. The program combines theoretical lessons with practical training, preparing students for careers in various industries such as automotive, manufacturing, and machinery.

EXPERIENCE

TOOLMAKER
MEI 2019 - AGST 2020

PT AMTEK ENGINEERING BATAM

A Toolmaker is responsible for designing, creating, and repairing tools and equipment used in the production process, such as molds, dies, and jigs. I work with various materials and machines to ensure that these tools function properly and meet the required specifications. Additionally, a Toolmaker also conducts testing and regular maintenance on the tools to ensure that production quality and accuracy are consistently maintained.

QUALITY CONTROL
PAINTING
JAN 2022 - DES 2023

PT ISUZU ASTRA MOTOR INDONESIA

Quality Control Painting involves inspecting and ensuring that the painted product meets the specified quality standards. The duties include checking the paint thickness, color, texture, and surface cleanliness before and after painting. Quality Control Painting is also responsible for detecting and addressing defects in the paintwork, as well as ensuring that the painting process follows the established procedures.

INTERNSHIP

TECHNICIAN
MANUFACTURE
MAR 2021 – DES 2021

BBPVP BANDUNG KEMNAKER

The job description of a Manufacturing Technician Training involves providing technical training to participants on production processes, machine operation, machine maintenance, and quality control in manufacturing. The training aims to enhance participants' technical skills, enabling them to identify technical issues, repair equipment, and ensure that production processes run efficiently and meet standards.
