FORMAL EDUCATION

Politeknik Teknologi Kimia Industri Medan (PTKI)

(2020-2023)

Major: Agribisnis Kelapa Sawit (Diploma 3)

GPA : 3.67 in scale of 4

Having specialization in applied Palm Oil Agribusiness . Also learning deeply enough about Palm Oil Industry. Final project briefly explains how to Control the quality of Crude Palm Oil using Six Sigma method.

Six Sigma is one of Quality control method, which is have 5 steps

(Define, Measure, Analyze, Improve, Control). First of all, we have to define the Critical To Quality of Crude Palm Oil's Quality , and then we have to determine the DPU and DPMO's value. The DPMO's value will be used to find the value of sigma level by using microsoft excel. After that, we can compare the average of sigma level with Sigma level's standart.
